- Ⓞ Qualified to Inspect, Repair or Replace your restraint parts
- Ⓞ Part 145 Approved repair centers around the globe
- Ⓞ Key stock provisioning offers immediate repair or replacement of many common parts. Ask us for details

MATERIALS AND WORKMANSHIP OF THE HIGHEST QUALITY

## Providing what customers need

- ⌚ Time – quality repair with the quickest turn around
- 💰 Cost – benefits of a OEM manufacture for your aftermarket needs
- 🔧 Service – professional repair or replace assessment with consultive updates
- 🏭 Capability – manufacture with OEM design and Part Manufacturing Authority (PMA)

Stock is held in-house to enable immediate overhaul and replacement products if the net is beyond repair. Only the correct materials and processes as specified by the original manufacture are utilized, and all repairs are carried out in accordance with European Aviation Safety Agency (EASA) / Federal Aviation Administration regulations.

In the event there is no OEM specification, AmSafe Bridport has the engineering capability and regulatory approvals (EASA Design Organisation) to develop in-house repairs.

Our service center network provides global coverage and comprehensive local support, with sites in the USA and UK.
