

ESCAPE SLIDES, RAFTS & INFLATABLE SAFETY EQUIPMENT - REPAIR & OVERHAUL

A trusted source for your Inflatable Overhauls

AmSafe Bridport™ is aviation's most trusted source for the repair and overhaul of slides, rafts and inflatable safety equipment. Its FAA Part 145 Repair Station in Anaheim, California is the largest of its kind, boasting more than 100,000 sq. ft. of production floor, with a 'capabilities list' that includes virtually every escape slide, life raft and vest flying today.

While large enough to service the requirements of major airlines, our unparalleled customer service allows us to react quickly to each customer's immediate and AOG emergencies.

The extensive 'on the shelf' inventory of spare parts and an ever growing list of PMA offerings, including AmSafe Bridport PMA Cylinders, ensures equipment is kept in service, in the air, and not on the ground awaiting parts.

Experience, innovation, quality and service – no one else comes close to AmSafe Bridport.

TRUSTED TO SERVICE AND OVERHAUL CRITICAL EQUIPMENT

Guaranteed dependable service – from a name you can trust

- ⊕ Full fleet support. The capabilities list includes virtually every escape slide, life raft and life vest flying today.
- ⊕ Industry leading '7 day – TAT' means your equipment spends more time on-wing.
- ⊕ Approvals: Federal Aviation Administration, European Aviation Safety Agency, ISO 9001, AS9100 and the Department of Transportation.
- ⊕ Hydrostatic testing, valve overhauls and cylinder re-charging are all performed in-house at AmSafe Bridport with no dependence on subcontractors.
- ⊕ Replacement components manufactured under FAA/PMA approvals are available.
- ⊕ Significant price savings over OEM pricing.
- ⊕ Extensive industry experience with a one-price guarantee.
- ⊕ AmSafe Bridport FAA / PMA Cylinders offer replacements for virtually every escape slide and oxygen cylinder flying in airline or corporate aviation today.
